- Suitable for a wide variety of private and public environments
- Qualified for contract use
- The table is available with square (AAT 15), rectangular (AAT 10) and round (AAT 20) tabletops

AAT 15

DESIGN BY HEE WELLING & HAY

The About A Table shares the general versatility and design language as the rest of the family. The table features the same powder coated frame as many of the chairs in the series, and the organic curves and raised feet convey a similar light expression. The tables are available with round or rectangular tabletops, with the round tabletop resting on a centred frame, while the rectangular version has its legs positioned at both ends and has a cross-bar construction. About A Table is available in two heights and a wide range of dimensions, enabling you to create a unique solution to match your needs.

Hee Welling is a Danish furniture designer who founded his own studio in Copenhagen in 2003. The son of a cabinetmaker, Welling's fascination with production techniques, materials, and machinery was fired as a child. He went on to study at The University of Art and Design in Helsinki, and received his master's degree in furniture design from The Royal Danish Academy of Fine Arts. Centred around the idea of creating technically accomplished products that can reach a wide audience, his designs are characterised by a great sense of proportion and quietly elegant aesthetics. Welling has received a number of design awards, including the Bo Bedre Award (Denmark), Good Design Award (USA), and has been nominated as Danish designer of the year in 2013 and 2014. For HAY, Welling has designed the About A series and the Hee Chair, Lounge Chair, and Bar Stool.

AAT 15 | Black linoleum tabletop | Black powder coated frame

SUSTAINABILITY

HAY focuses on developing long-lasting products that minimise the environmental impact throughout their lifecycle. We prioritise carefully selecting materials, such as recycled content, FSC-certified wood, and water-based lacquer, while continuously increasing the number of eco-certified products. We adhere to strict regulatory requirements, and the majority of our products are tested to meet international standards for strength, durability, and safety.
