- Functional, flat-packed, and easy to assemble
- Available in a variety of sizes and colours
- HAY recommends using Standard Bed Slats and Standard Mattresses with Connect Bed for the optimal complete solution
- Suitable for a wide variety of private and public environments

CONNECT BED

DESIGN BY LEIF JØRGENSEN

Connect Bed takes the idea of traditional craftsmanship methods combined with the computer-controlled, high-tech tools and processes which have now become commonplace in the contemporary designer's world to create a minimalistic, industrial look. The result is a razor-sharp design with pinpoint precision and an easy-to-assemble construction. Embedded in the bare frame, the screws become an interesting detail in themselves, with the joints displaying references to conventional carpentry work. Available in different size and colour options, Connect's uncluttered aesthetics and modest expression make it easy to integrate in most bedroom styles and décor. HAY recommends using Standard Bed Slats and Standard Mattresses with Connect bed for the optimal complete solution.

Leif Jørgensen is a Danish designer and architect based in Copenhagen who founded his first design business in 1989. He works in the fields of interior and exterior architecture, and in product design. He has particular experience with retail design and has created numerous concepts for the fashion industry, along with products, office spaces and private houses. His approach is dictated by a desire to develop original ideas and to push boundaries of traditional product typologies through the application of new techniques and production methods. An inquisitive designer, Jørgensen has a keen interest in how products and concepts are influenced by their cultural and social context. His One Series of upholstery pieces for HAY was a part of the inaugural product collection, he has also designed the Loop collection and the Connect Bed.

SUSTAINABILITY

HAY focuses on developing long-lasting products that minimise the environmental impact throughout their lifecycle. We prioritise carefully selecting materials, such as recycled content, FSC-certified wood, and water-based lacquer, while continuously increasing the number of eco-certified products. We adhere to strict regulatory requirements, and the majority of our products are tested to meet international standards for strength, durability, and safety.
