Safety precautions

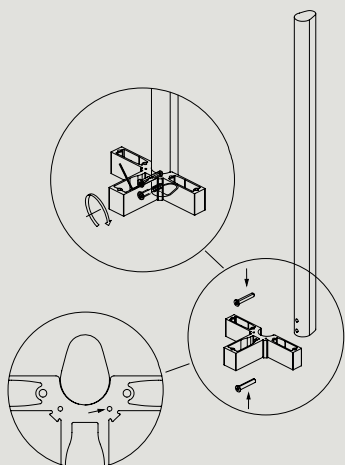

- Dispose of plastic bag from packaging and do not allow children to play with it.
- The table is only intended for indoor use.
- Handle tabletop with care in order not to scratch surfaces.
- Two or more adults are required when lifting the table.

Cleaning instructions

Laminate can be cleaned with a soft cloth wrung in a mild solution of lukewarm water and an universal cleaning detergent. Always wipe with a dry soft cloth after cleaning. For difficult stains such as coffee or tea use a nylon bristle brush with mild household cleaner or detergent, rinsing with clean water and repeating as necessary. Rinse thoroughly with water.

Aluminium (powder coated or polished) can be cleaned using a soft cloth wrung in lukewarm water. Always dry immediately with a soft cloth. Avoid use of abrasive cleaning products such as steel wool as this will cause damage to the surface.

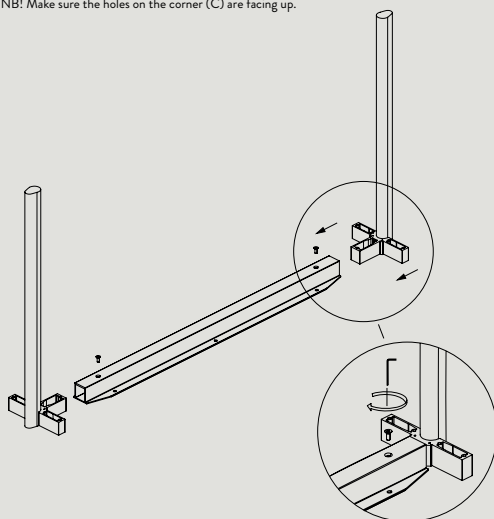

NB! Make sure the holes on the corner (C) are facing up.

Step 1

Fit the T-Bracket (D) and top section of the leg together with x2 long button screws (J). The x2 small holes on the T-Brackets (D) must be facing upwards, see illustration.

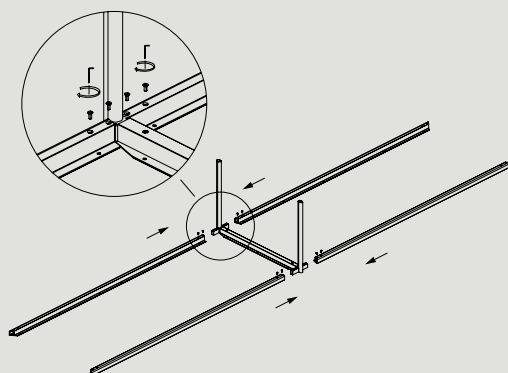

Important: Make sure you tighten these screws properly to ensure each leg is secure.

Step 2

Insert the T-Brackets (D) into both ends of the central frame (G) as shown, and attach them with a flat head hex screw (H).

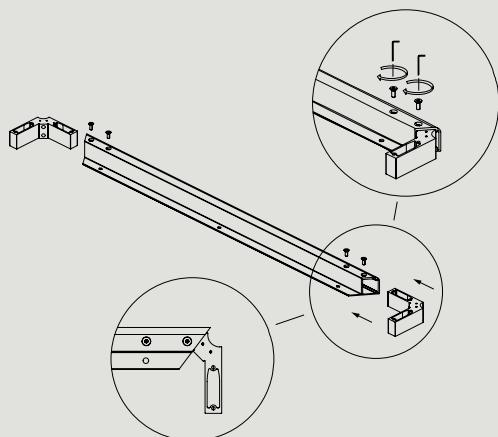

Important: Do not completely tighten the screws at this stage.

Step 3

Insert the x4 long frames (E) into each side of the two T-Brackets (D) as shown, and attach them with the flat head hex screws (H).

Important: Do not completely tighten the screws at this stage.

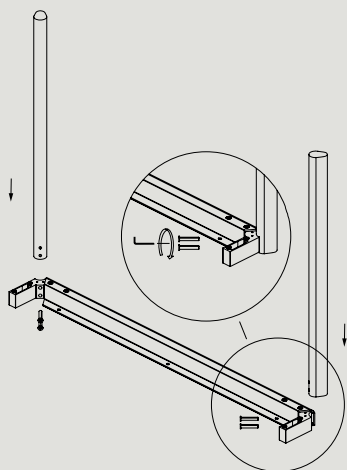

Step 4

Insert the four corner brackets (C) into the ends of the two short frames (F). Fasten with the flat head hex screws (H). The 2 small holes on the corners (C) must be facing upwards, see illustration.

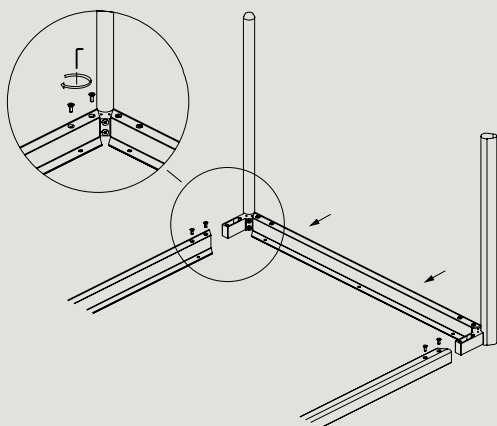

Important: Do not completely tighten the screws at this stage.

NB! Make sure the holes on the corner (C) are facing up.

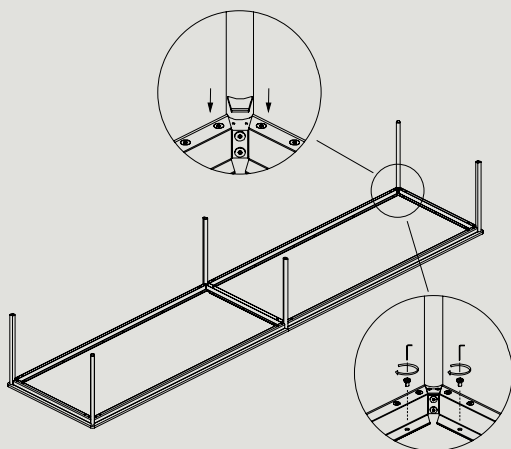

Step 5

Place the leg-section (B) on the frame upside down and align all four legs in each corner (C). Install two long button screws (J) in each corner to connect them.

Step 6

Insert the installed short frames (F) into both sets of long frames (E). Fasten with x4 flat head hex screws (H) in each end.

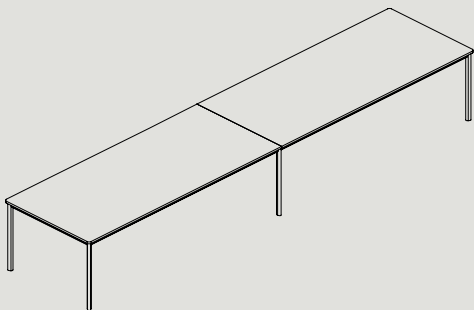

Step 7

Place the cover components (M) on each of the 6 leg brackets (C) and attach them with screws (K).

Step 8

Place both tabletops (A) upside down on a soft, flat surface, making sure that the rounded corners are facing the ends. Then place the frame on top, upside down. Use the short button screws (I) to secure the top to the frame.

Important: Only install the screws (I) slightly and then finally tighten all of them to secure correct fit.

Step 9

Finally, double check that all screws are tight and secure. Then flip the table and enjoy your product.
