ARCS TROLLEY DESIGN BY MULLER VAN SEVEREN

Designed by Belgian duo Muller Van Severen, Arcs Trolley is a functional and decorative trolley encased in a unified chain of vertical arcs. A small piece of furniture with a strong presence, the trolley combines industrial techniques with poetic lines to create a distinctive and sculptural expression. The elegant, scalloped frame supports two or three tiers, with slim legs mounted on castors for easy manoeuvring. Made in powder coated steel in different colour options, the trolley is suitable for most rooms and uses in the home, from displaying and storing items in the living room to extra shelving in the kitchen or as a bedside cabinet.

Muller Van Severen was founded in 2011 by Belgian artist duo Fien Muller and Hannes Van Severen. The couple has always been on an inspired quest for sculpturally interesting furniture objects, and their work sits somewhere between design and art, drawing on their passion for architecture and materials. They have won countless awards and collaborated with prestigious museums worldwide (such as Vitra Museum, Centre Pompidou and Musée des Arts Décoratifs Paris) and international galleries (Galerie Kreo, Side Gallery, Valerie Traan Gallery). For HAY, Muller Van Severen has designed the Two-Colour Table, Colour Cabinet, and Colour Rack and Hanger, along with the Arcs series comprising the Arcs Lamp Shades, Candleholder, Vase, Mirrors, and Trolley.

SUSTAINABILITY

HAY focuses on developing long-lasting products that minimise the environmental impact throughout their lifecycle. We prioritise carefully selecting materials, such as recycled content, FSC-certified wood, and water-based lacquer, while continuously increasing the number of eco-certified products. We adhere to strict regulatory requirements, and the majority of our products are tested to meet international standards for strength, durability, and safety.
