HAY

BACKFLIP CHAIR

HIGHLIGHTS

- Folding wooden chair balancing comfort, aesthetics, and performance
- Stable in use, compact when folded for easy storage or hanging
- Smooth, single-handed folding and unfolding by rotating the backrest
- Optional wall bracket for convenient hanging
- Available in natural beech and a range of coloured finishes
- Suitable for a wide variety of private and public environments
- Qualified for contract use

BACKFLIP CHAIR

DESIGN BY GUDMUNDUR LUDVIK

Designed by Gudmundur Ludvik, Backflip is a flexible versatile chair for everyday use, its design allowing it to be easily stored, hung, or brought out and placed as needed, without compromising on comfort or appearance. Balancing aesthetics and technical performance, it is shaped by a clear focus on function and ergonomics, with form emerging from its materials and construction. Crafted in solid wood with a moulded plywood backrest, its simple appearance conceals a refined mechanism within the backrest, allowing the chair to fold and unfold in a smooth motion – bringing flexibility and ease of use. Available in natural beech in a range of coloured finishes, it fits easily into both private and public settings, for daily or occasional use.

Gudmundur Ludvik Gretarsson (b. 1970) is an Icelandic designer based in Vejle, Denmark. His work is rooted in Scandinavian traditions and a process-led approach focused on simplicity, material clarity, and functional integrity. Today, he runs his own studio, designing furniture and objects spanning craft, art, and design. For HAY, Gudmundur Ludvik has designed the Backflip Chair.

SUSTAINABILITY

At HAY, we believe good design should stand the test of time. That principle shapes the decisions we make – from the materials and suppliers we work with to the certifications we pursue to ensure our products meet recognised standards. We use recycled content where possible, FSC®-certified wood (FSC-C148805), and bio-based foam that helps lower our products’ overall carbon footprint. We are also increasing the number of products certified with the EU Ecolabel and the Nordic Swan Ecolabel, reflecting our ambition to make lower-impact choices across our assortment. HAY follows strict regulatory requirements, and most of our products are tested to meet international standards for strength, durability, and safety.
