

Marble | Care & Cleaning

Congratulations on your new original &Tradition product

This table top is made from natural marble. Variations in structure and colour of the marble are natural characteristics of marble and should not be considered a defect nor are they valid reasons for claims.

The table top is treated with a sealer which makes the table top more stain resistant than untreated marble. However, it is strongly recommended always to use a trivet and not place glasses or cups with liquids directly onto the marble table top. As a natural material, marble is sensitive to liquids and if not removed immediately, spilled liquids will leave a permanent stain on the table top.

Instructions

For daily cleaning of the marble table top it is recommended to use a cleaning agent specifically developed for stone or marble. It is also highly recommended to do a re-sealing of the table top every second month using an appropriate sealer developed specifically for stone or marble.

If the above advise is followed, the marble will last a lifetime and continue to look great over time.
